LaTeX uses the commands, and *hello* subsection to ***bold text*** define sections in your document The sections will have successive numbers and appear in the table of contents Paragraphs are not numbered and thus $y = x^2 - 3$ don't appear in the table of contents

$$2 + \frac{3}{x-1} = 4 + x$$

$$\frac{3x+4}{2x-1}$$

$$y^2 + \frac{x^3}{x+2x^2-1} = 5 + x^{-2}$$

$$\frac{5x-8}{2x-1}$$

$$X = \frac{\textit{Some text here}}{\textit{And some text here}}$$

$$Y = \frac{\textit{Will make everything}}{\textit{Look too close together}}$$
